

Emergifi Managed Patching and Software Updates

Get Peace of Mind with Reliable, Secure and Transparent Patch Management and Software Updates

Our managed patching and software update services seamlessly update your assets, including the software your organization relies on every day for secure computing. Operate your business without interruption through secure and reliable monitoring and management.

Benefits

Security

Your computers receive seamless updates, an essential component for secure computing environment.

Productivity

Your staff is more productive with optimized computers receiving the latest software fixes.

Competitiveness

Your team uses the latest software features and capabilities with regular software updates.

Compliance

Your patching and software updates reduce risk and are compliant with best practices and regulations.

Just as new threats are constantly surfacing, so are the security measures to keep data secure, users safe, features current and computers optimized. Emergifi can manage your security patches and software updates, so you can focus your time and energy on the core businesses that deliver high value solutions to your members.

Our Approach

- 1. Discovery:** First, we perform a discovery that finds all computers and gathers details for the implementation process.
- 2. Implementation:** Next, we define software update and patching policies such as patching scheduling, computer role group or user groups that meet your needs.
- 3. Remote Monitoring and Management:** Then, on an ongoing basis, we evaluate patches and updates and patch computers and update software including off-network devices in the field. Based on predefined patching policies and schedules, we manage updates to minimize business impact.
- 4. Audit and Compliance:** You receive reports for your audit, risk and regulatory compliance needs.

Emergifi Patching and Software Updates is available for Adobe, Apple Safari, Foxit, Google Chrome, Microsoft 365, Mozilla Firefox, Oracle Java 6, Oracle Java 7, Oracle Java 8, Skype, Windows, and Zoom. Contact us for pricing and to schedule an implementation date.
